

# Wave Of Change

---

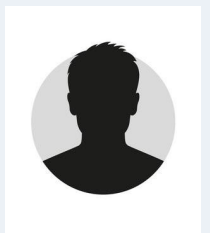

Ocean plastics..... the world's WORST invasive species. Small steps can lead to big change. See what you can do in your area to fight the influx of plastics in our oceans.

Wave of Change is a source of information on clean up efforts in areas all across the US. Our platform engages with local environmental clean-up initiatives to connect with the surrounding community. We provide current information about local clean up events, including dates, times, locations, and details about the different locations of waterways. Our platforms will also keep you informed about relevant legislation supporting these initiatives. Join us in creating a cleaner, healthier environment. Together, we can turn the tide on pollution and restore the beauty to our waterways.

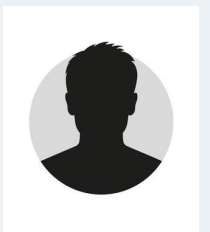

## Personas

A 30 year old woman, moving to a new area for work. Learning more about living in a coastal city.

A 60 year old man looking up local area events to get involved in his community.

Commercial fisherman researching the effects of lost fishing gear.

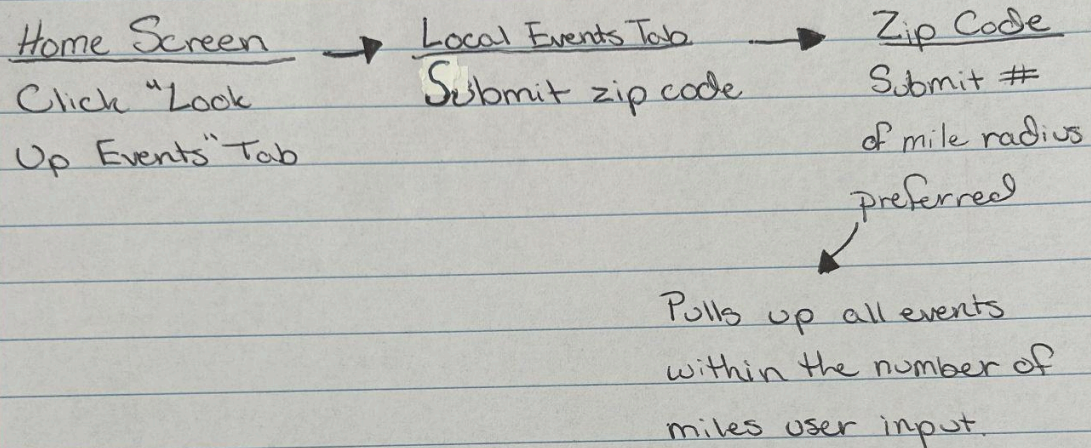

## Comps

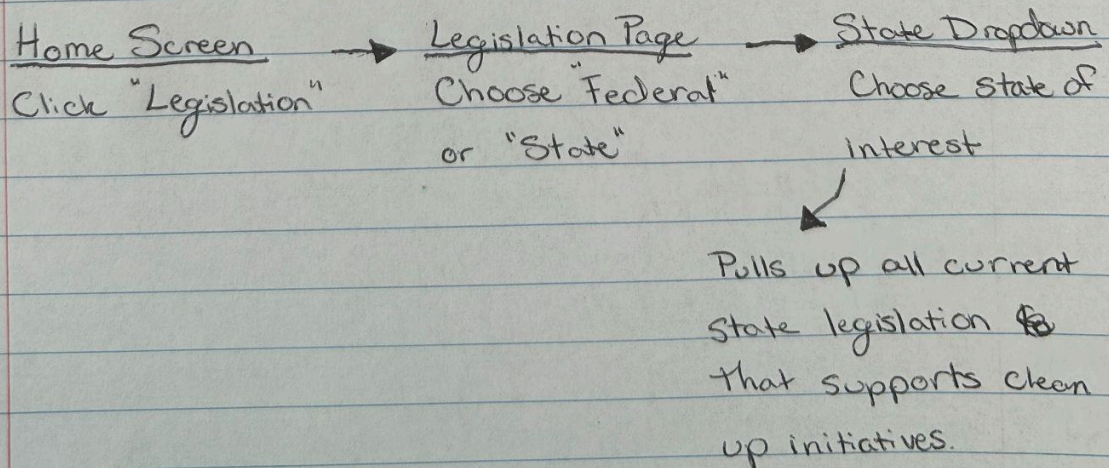

## Shorthand Flow

### Wave Of Change Shorthand Flow

- User wants to look up local clean up efforts using their zip code to find an event within a 20 mile radius.

- User wants to look up legislation that supports the clean-up initiatives.

## Comp

(I made a comp of the about us page because I thought I could fill in the best out of any of the other pages, I made the page figma and can submit it another way if this is not a good way to submit it)
